RE: Statement of Retraction RE: Election 2020: Green Party Makes Advances at the Expense of the Proponents of the Rental Tax

<@MemberFirstName>:

The MXB Wire has retracted the article, Election 2020: Green Party Makes Advances at the Expense of the Proponents of the Rental Tax, after receiving information from a number of former board members into election tampering and in particular a scheme otherwise known as ballot hijacking. This service now believes that the election results were skewed in err due to the fact that one or several persons in authority directed third parties to consume ballots having no mention of an appointee in the first paragraph and resubmit these ballots with the selections of the person or persons in authority and not the selections of the originating owner of the ballot.

If the accounts and allegations are true, the election results more reflect the will of the person or persons in authority who orchestrated and directed the third parties to effectively steal the election rather than the will of the community members. If the accounts and allegations are true, the votes of the community members had little to no bearing on the results of the election.
